Equipment	Plane Power alternator & VR	Airglas LW-3600 penetration skis
Madras SuperTips	Spin-on oil filter	
Ski axles	Vernier throttle control	
Custom hinged bulkhead	Utility folding rear bench seat	

This is a well-maintained privately owned aircraft. It is a clean, corrosion free airframe with only minor damage history. In 1990, the 337 says a few ribs and 2 skins on the horizontal stab were replaced. The engine was recently overhauled and a factory new propeller was installed at time of overhaul. The engine has a spin on oil filter and good cylinder compressions. The aircraft has an older utility interior and needs paint, but will make a perfect utility Cessna for some outdoor adventurer. Same meticulous owner for past 30 years, only selling due to age and getting ready to retire.
