Based at KARR

Description: **OWN A PIECE OF AVIATION HISTORY.** The Travel Air Manufacturing Company was founded in 1925 by Walter Beech, Clyde Cessna, and Lloyd Stearman – the historic trio of aviation leaders in American aviation. The Travel Air 10D model was a high-winged monoplane with an enclosed cabin. It was marketed as a luxurious executive aircraft. Serial number 10-2011 rolled off the assembly in Wichita, Kansas in 1929. It was fully restored to its original condition in 2007 and has been actively flown and maintained since. This is your opportunity to own the last remaining Travel Air 10D in existence - an incredible piece of aviation history.
